1 Introduction of Web CMS 2006

www.fristweb.com

Congratulate to select web CMS! Because it is a build site system which has the most powerful components, the most templates and the most abundant language categories in the world at present. You can build and manage your own website conveniently as long as you can type!

- 1. Ten thousands of templates, hundreds of website cover and dynamic menu styles selected by you at random!
- 2. Front and back of Web CMS 2006 support 12 kinds of languages, such as Simplified Chinese, Traditional Chinese, English, French, German, Russian, Japanese, Korean, Spanish, Portuguese, Italian, etc.
- 3. The on-line HTML editor which has powerful functions supporting character, picture, flash and video mixed arranged.
- 4. The multilevel items which can be added, deleted, modified and arranged at random. And you can hide the items and change visiting permission of user groups.
- 5. Equipped with multiform function modules, such as, single page, independent page, self link, news, pictures, feedback, guestbook, download, want ad, trade, shopping, self-form, etc.
- 6. Convert item content to Javascript code using Create Code and put the code into the position needed, which can achieve dynamic update.
- 7. You can select and design the style of templates. Items for selected include model style, model color, menu style, copyright, friendly link, Banner ad, count, member zone, language bar, template background, top background, news, pop window, addons, Javascript effect, etc.
- 8. Equipped with the share functions which include member manager, files manager, analyze flux, logo, link manager, email to be sent, Traditional Chinese to Simplified Chinese. Simplified Chinese to Traditional Chinese, etc.
- 9. The style of cover can be customized or uploaded directly.
- 10. User management equipped with scores and item visiting permission are integrated perfectly.

The new features of web CMS 2006:

New feature 1: 12 kinds of languages

New feature 2: 21600 templates

New feature 3: Single page

New feature 4: Independently page

New feature 5: News

New feature 6: Pictures

New feature 7: Feedback

- New feature 9: Trade
- New feature 10: Want Ad
- New feature 11: Files download
- New feature 12: On-line shopping
- New feature 13: Self form
- New feature 14: Analyse flux
- New feature 15: E-mail to be sent
- New feature 16: Javascript effect
- New feature 17: News comment
- New feature 18: Reply message
- New feature 19: Identify language automatically
- New feature 20: Trade order

2 Begin to use Web CMS

2.1 System requirements

This system requires internet explore 5. 5 or higher. The website generated by this system may be browsed in all internet browsers.

2.2 Begin

Clicking new user registration and enter the interface shown below.

Registration st	ep 1
* Member ID:	3 to 16 characters (A-Z, a-z, 0-9, _, no space)
	Submit Reset

User name is comprised of letter, number or underline, length 3-16 bytes. After input user name, system will examine whether the user name existed automatically, you need input a new one if it existed.

Next step - fill the information of registration

2.3 Fill in the information of registration

FRISTWEB.COM	www.fristweb.com NETWORKING TECHNOLOGY (THAILAND) COMPANY LIMITE
Registration step 2	
* Туре:	Please Select 💌
* Language:	You can select 1-3 languages. If you need more languages, please contact us. Simplified Chinese Traditional Chinese English French German Russian Japanese Korean Italian Spanish Portuguese
* Password:	6 to 16 characters, case sensitive
* Confirm Password:	Please input Password again.
* Password Question:	For example: Who is my brother?
* Secret Answer:	You will be asked to anwser the Password Question if you forget password.
* Email:	Please ensure you enter a valid email address.
Web Address:	
* Company Name:	
* Name (Contact Person) :	
* Phone Number:	We will only use your telephone number if we need to contact you with a query about your account.
Fax Number:	

Validate Codes

If no picture appears, please make sure your browser is set to display 3709 pictures and try again. If you are not sure what the text is, take your best guess. **Confirm Codes** Enter the text you see from the image.

Warning: Only figures can be passed. And '0' means zero, not the letter '0'. Submit Reset

Next step - enter users' back after successful registration

2.4 Enter users' back

After fill the information of registration, click "submit", enter users' back directly.

4.6 Set website logo

Design website cover - Set website logo

Set website logo means change original logo of cover page (resemble as the website logo, the same operation step. The difference is website logo displayed in each page, the logo of cover page only displayed in cover page).

Path: Manage menu in the left side of back "Design website cover" \rightarrow "Set website logo" Click "Set website logo", page layout of back shown below.

The Current Logo: Company name	
O Show © Hide	
Thange the Logo Image Logo: <u>Select a Logo</u>	
Flash Logo: <u>Select a Logo</u>	
URL:	
┌─ Set the Logo Size ─────	
Width: 150 Pixel	
Height: 75 Pixel	
┌ Set the Logo Link	
Link:	
Target: Self	
Submit	

The content of image above is the same with the operation step of "set website logo". for more details see page6 -7.

4.7 **Pop window**

Design website cover - Pop window

Set the size, the content and the title of the window in the cover page. You can show news or advertisement commonly by it.

Path: Manage menu in the left side of back "Design website cover" \rightarrow "Set pop widow"

Click "Pop window", the page layout of back shown below.

	www.fristweb.com	NETWORKING	TECHNOLOGY	(THAILAND)	COMPANY LIMITED
Title:]				
Width: 300 Pixel					
Height: 300 Pixel					
🗓 Edit Content					
O Show 💿 Hide					
Submit					

The title of window: it means the title of pop window when preview cover page.

Width and height: The size of pop window in the cover page.

Click "Edit content" button, the back pop the editing area shown below. If you need not the pop window in the cover page, you can select "hide" under the "edit content".

You can input any content or insert code in the editing area according to your personal habit or company needs. Such as news or advertisement, click "submit" after edit, set "pop window" successfully (note: be sure select "display" in "set pop window", because the system default hide state).

4.8 Set Javescript effect

Design website cover - Set Javascript effect

Set Javascript effect: it means set the special effect of cover page, such as: fluttering image, followed by the mouse etc.

Path: Manage menu in the left side of back "Design website cover"→"Set Javascript effect"

Click "Set Javascript effect", the page layout of back shown below:

Click"Edit content", enter into the editing window shown below:

Submit

The special effect of webpage which we edit are always some effects that usually use, such as floating images, color changed background, followed by the mouse etc. You may copy the effects code to the editing area directly, click "submit" after that, set Javascript effect successfully

4.9 Self cover

Design website cover - Self cover

Self cover means design website cover by yourself

Path: Manage menu in the left side of back "Design website cover" \rightarrow "Self cover"

Click "Self cover", the page layout of back shown below.

	www.fristweb.com	NETWORKING TECHNOLOGY (THAILAND) COMPANY LIMITED
🔲 Use Self-Cover	Edit Cover	
	Submit	

Click "Edit content", enter into the page shown below, you may not only upload "self cover" and relative images, media files, but also the images in the library, media files etc which have been uploaded.

(note: be sure select "Self cover", otherwise the it wont display)

5 Set Multiple Language

Set multiple language may set the language which you need and the default language of the homepage Path: Manage menu in the left side of back \rightarrow "Set multiple language"

Homepage of your Site 🔶 Cover 💌		
A	uto-detect Client Language 🕈 🔲 Use	
	If you need more languages, please contact us.

Submit

We elaborate practical meaning and functions of each item in the image above:

- ① Item name: the title of each item (you may modify directly here).
- 2 Item level: the level shown in dynamic menu(level "0", shown in menu bar directly, level "1", shown in the branch of menu bar, level "2", shown in the branch of level 1.
- ③ Add new item: Add a new item which has the same level with the current one after the current one.
- $\underbrace{\textcircled{4}}_{\bigcirc}$ Add a sub-item: Add a new item for the current one (the level sub-item is bigger than the father 1).
- (5) Add a separator: Add a separator after the current one.
- 6 Edit /Manage: In the seventh item, click "edit" or "manage", you may edit or manage this item.

www.fristweb.com Delete item: Select in the check box of the last item, click "submit" delete this item. $\overline{7}$

6.2 Add new item

Website management - Add new item

Add new item means newly-built item, item types are corresponding with function management. Path: Manage menu in the left side of back "Website management"→"Add new item" Click "Add new item", page layout of back shown below:

	ww.fristweb.com	NETWORKING TECHNOLOGY	(THAILAND) COMPANY LIMITED
Design the Model O Manage Iten	Modify Items	Arrange Items	Set Items
C English Version - Add a Hem			

* Item Name:	
* Type:	Please select a Type. (Warning: The type can't be changed after selected.) Single Page (build a item with a single page, for example, introduction of your company, contact, etc) Independent Page (model-independent, can be changed completely.) Self Link [http:// News (a item with articles, applied for news, data, etc; build multilevels) Pictures (show pictures, for example, products, certificates, etc; build multilevels) Feedback (applied for feedback, enquiry, support, etc) Guestbook (build a guestbook) Trade (post trade leads) Wart Ad (build a item for online download; build multilevels) Shopping (include shopping cart, order form; build multilevels)
Target:	Self 💌
Show:	Show
Hint:	
	specify who can view this page
* Purview:	
	Submit

We elaborate actual meaning and function of each item in the image above:

Item name: it means the name of newly-built item, it will be shown in the menu bar of webpage, it is the "homepage", "hot news"in the "item manager" after submit.

Item type: it means the type of newly-built item, the operation is to select a function in the item types of image above as this item type.

Target: Set whether the item open in the original window. There are two options in the drop-down list: "self" and "blank", that means the newly-build item switch from the original window or pop a new window when preview.

Show: Set whether the newly-built item show in the menu bar of webpage. If we select "hide", the item will not be shown in the menu bar when preview the website.

Hint: The introduction of item when preview webpage and putting the mouse on the item character

Purview: The permission when visitor visit the item

When all the above content is completed, click "submit". Then add new item successfully.

We elaborate the actual meaning and functions of each item in the image above:

• Single page:

Build an item with a single page; for example, introduction of your company, contact, etc.

- Independent page: Model-independent, can be changed completely.
- Self-link:

Set the link which arrive at other URL, enter into appointed URL after click.

• News: A item with articles, applied for news, data, etc; build multilevels.

• Pictures:

Show images, for example, products, certificats, etc; build multilevels.

• Feedback: Applied for feedback, enquiry, support, complain, etc.

• Guestbook: Build a guestbook.

• Trade: Post trade leads.

• Want ad: Build a item for want ad.

- Download: Build a item for online download, for example, software, download files.
- Shopping: Include shopping cart, order form, and build multilevels.
- Self form:

Follow your inclinations to build a form.

Website management - Modify item

Modify item means modify item name, set show or not, target, add hint, etc.

In the process of designing website, website maker may change original setting according to actual situation.

Path: Manage menu in the left side of back "Website management" \rightarrow "Modify Item" Click "Modify item", page layout of back shown below:

esign the Model	Manage Items		Modify Items		flanage Items 💽 Modify Items		Arrange Items	Set Items

Submit

We elaborate the meaning and function of each item in image above:

Sort: it is different from the sequence in "arrange item", the sequence means the order of items shown. the sort commonly means the item type, such as "News", "Images", "Feedback", "Guestbook", "Want ad", "Download", "Shopping", "Self form", the content is not be added at the same time, so we may select sort here. It includes "Ascend", "Descend", and "Self". That mainly depends on the sequence number we filled in when we add content.

Per row count: That is in "Images" and "Shopping" two items, the number of images displayed in per row. You may set according to different need and habit.

Per page count: Set content of "News", "Page", "Guestbook", "Trade", "Want ad", "Download", "Shopping", "Self form" shown in each page. Adjust it according to your different need and artistic website.

Width and height of thumbnail: the function is to define the thumbnail which need uploaded in "Images", "Trade", "Shopping". Set it according to the integrated structure and artistic of webpage.

Purview: Set the authority of visitors.

All the options completed, click "submit", set item settings successfully.

Website management - Set news

It means set the up to date content of website, display in the certain position (left column or the right column)after setting, you may also input the other content, modify the title of item.

Path: Manage menu in the left side of back "Website management " \rightarrow "Set news "

Click "Set news ", page layout of back shown below:

Edit Content			⊙ _{Show}	O Hide
	Title: News			
		Submit		

Fill in title: The title filled in is the main title displayed in the "news "area.

click "Edit content ", enter into the editing area shown below, you may not only edit news, but also fill in the other contents which noticeable, such as, "hot news ", "news published "(shown above, if you want to set news, you must select "show ", otherwise the edited content wont be shown in the website)

Link:]	Target:	Self 💌	
		Submit			_

Change banner: you may upload image or Flash ad, also use the web ad.

Set banner size: set the height and width of banner displayed in the upper of website.

Set banner link: arrive at the URL of linked after clicking ad, set whether open in original window.

After complete the options above, click "submit ", set Banner ad successfully.

6.11 Set pop window

Website management—Set pop window

Set pop window means set pop window or not, the size and the title of the window, edit window content

Path: Manage menu in the left side of back "Website management " \rightarrow "Set pop window" Click "Set pop window", page layout of back shown below.

NETWORKING	TECHNOLOGY	(THAILAND)	COMPANY	LIMITED
------------	------------	------------	---------	---------

	Title:			
Widht: 300 Pixel		Height:	300	Pixel
🕒 Edit Content			O Show	⊙ _{Hide}
	Submit			

Title: the title of window when open website

Height / width: the size of window

Click "edit content "pop the window shown below, edit the content displayed in "pop window".

Normal HTML Preview 🔳

The "pop window "usually set as ad or bulletin because of the conspicuous position in the website editing, if you don't need the pop window in website, you should select "hide ".

6.12 Set addons

Website management - Set addons

It means set the content of top right corner in website, default "display time ".

Path: Manage menu in the left side of back "Website management "→"Set addons " Click "Set addons ", page layout of back shown below:

Click "Edit content ", enter into the page shown below: content default "display time ".

Submit

Here default is display time, you may change into other code according to your own habit, for example, weather forecast, constellation hint etc.

6.13 Link manager

Website management - Link manager

Link manager is websites exchange link. "Friendly link "is character link or image link. And you may select the arrange mode of friendly link, set the quantity of friendly link.

Path: Manage menu in the left side of back "Website management "→"Link manager"

Click "Link manager ", page layout of back shown below.

FRISTWEB.COM	www.fristweb.com	NETWORKING TECHNOLOGY	(THAILAND) CO	M
	G Friendly Link Manager			
Display Count: 5	Sort: Ascend 💌	⊙ Show	77 O Hide	
Current Color:		Change Color: <u>Sel</u>	ect Color	
	Submit			

Display count: you may set the count of friendly link displayed in website

Sort: the sequence of friendly link displayed in webpage, include ascend and descend (sorting depend on the sequence number filled in when adding friendly link)

Set whether display "friendly link "

Text color: set text color displayed when link, default color as black

6.14 Set Javascript effect

Website management - Set Javascript effect

Set Javascript effect means set webpage effect, such as fluttering images, followed by mouse, changed color background, etc

Path: Manage menu in the left side of back "Website management "→"Set Javascript effect "

Click "Set Javascript effect ", page layout of back shown below:

Edit Content		⊙ _{Show} ⊂ _{Hide}
	Submit	

Click "Edit content "pop the editing area shown below:

Submit

You may input code of Javascript effect in the editing area, if you don't need the effect in your website, select "hide " in the image shown above

6.15 Set model style

Website management - Set model style

This system provides 100 kinds of webpage modes, 216 kinds of website color for users. Path: Manage menu in the left side of back "Website management " \rightarrow "Set model style " Click "Set model style ", page layout of back shown below:

G Select a Model Style	Style Number: 1	
3 Select Color	Color Type: 1	
Site Name:		
Submit		

Click "select a model style" select the model style of each element arranged, that is integrated model of website(include position arranged manner of "Member zone", "Friendly link", "Language bar", "News", etc.)

www.fristweb.com

Open the type which need transferred, pitch on the news need transferred, the image above ① shows, in the drop-down list ② of image above, select the target option which news will transfer to, click "submit ", jump successfully (note: after jump successfully, news jump to the type pitched on from original type, the process is different from "copy", but equal to "cut "operation)

4) Create code:

Create code: When we add news items of homepage or other page ("Single page "/ "Independent page "), it is inefficient to add manually and get more trouble when update news. So we use "Create code "here, "Create code "create the news content of items which pitched on "dynamic code ", insert homepage or other webpage, when the back of this news item upgrade, the items(homepage/other page inserted create code)of news which insert create code upgrade along with it automatically.

Operation: enter into the back of "News", click the "create code "in the upper of back stage

Enter into the following image shows:

Data Manager Ty	pe Manager	Transfer Type	Create Code
🔘 news - Create Code			
Type Name:	Тор		
Total:	10		
Sort:	Descent 💌		
Title Font Size:	10	pt	
Title Font Color:	Selec	t. Color	
Time:	C Show 🖲 Hide		
Time Font Size:	10	pt	
Time Font Size:	Selec	t. Color	
	Subr	nit l	

It is simple to use "Create code ", select some condition shown, press "submit "button, then create the code.

We elaborate the setting method of create code:

Type name: the item type which need create news code (select in the drop-down list)

Total: the news quantity displayed in homepage or other single page after create code. default 10, you may set according to designing situation of page which inserted code (if there are many news in the type, the system will sort according to the news sequence, then create the news quantity according to the sort which you select; if the news are less than the quantity you filled in, it will display all the news in the type)

Sort: the news sequence method of the page which need insert code after create code (according to the sequence number you set when add news)include "Ascend ", "Descend ", "Self "

Title font size/color: What "create code" create is not entire chapter news, but the news title with hyperlink(enter into the paper of news content when clicking the title of news), the "font size/color "means the size of news title.

Time: What "create code" create is not only the title of news, but also the time of publishing news, we may select whether display

Time font size/color: The same meaning and function with title font size and color.

After setting the above options, in the back, we enter into the following image shows:

Pictures which add newly will display in the page after add pictures. The image above shows:

Click the "change " of image above, enter into the editing page of pictures again, you may reset the "Title ", "Time ", "Sequence "and "Type "of pictures.

In the image above, you may check the content of pictures by clicking the title of pictures

Pitch on "delete ", click "submit ", the pictures will be deleted.

www.fristweb.com

2) Type manager:

Type: Convenient for users to classify the content of pictures, if you don't classify, all the pictures default top type; after classify, all the pictures displayed as classified in website

Operation: enter into the back of "Pictures ", click the "Type manager "of back. Back enter into the page shown below:

Data Manager	Type Manager	Transfer	Гуре	Create Code
O commodity - Type M	lanager			
⊢ Jump to Specified Typ	e Type: Top 💌 Start Jumping			
	Add Type		Агга	nge Type
Delete	Level			Type Name
		Submit		

Add type: click "Add type ", enter into the page shown below:

Data Manager	Type Manager	Transfer Type	Create Code	
C commodity - Type Manager - Add Type				
Jump to Specified Type	туре: Тор 💌 Start с	Jumping		
	Type Name:			
		Submit		

In the textbox of "type name ", input the name of type which you want to input, add type successfully after submit!

If you want to continue, the method is identical with above. The following image shows: the type added display in the back.

NETWORKING TECHNOLOGY (THAILAND) COMPANY LIMITED

We can get a further classification of the type which we added, click the type which we just add in the drop-down list of sort, start jumping, then click "Add type ", the original level of type is 0, the new type based on the original one is 1, reason by analogy.

www.fristweb.com

Data Manager	Type Manager	Transfer Ty	pe Cr	eate Code
O commodity - Type M	anager			
⊢ Jump to Specified Type	r Type: Top ▼ Start Jumping			
		_		
	Add Type		Arrange T	ype
Delete	Level		Type Na	ma
	0 000			
L I		Submit		

The image above shows: if you don't want to keep new type, pitch on "delete ", click "submit ", the new type will be deleted.

Type level, the type level under the top is 0, the type which added by jumping to other types is lower than the original level (the original level is 0, the type level which added based on it is 1)

Arrange type: click "Arrange type ", enter into the page shown below:

	www.fristwe	b.com NETWORKING	TECHNOLOGY (THAILAND)	COMPANY LIMITED
Data Manager	Type Manager	Transfer Type	Create Code	
O commodity - Type Manager				
Jump to Specified Type Type:	Top 💌 Start Jumping			
		Add Type		
Operation		ltem Name		
↑ ↓ 000 ↑ ↓ 001 ↑ ↓ 002 ↑ ↓ 003				
		Submit		

Adjust the position by clicking the arrow shown above, then submit, arrange type successfully.

The above "arrange type "is in top type, if you want to adjust the position of other types, you should jump to that type firstly, set the subclass after jumping successfully.

3) Transfer type: In the process of designing website, sometimes we need change the content of pictures in original type to the other types, so the functions of "Transfer type "can meet the needs.

Operation: enter into the back of "Pictures ", click the "Transfer type "in the upper of back

In the back, we enter into the following image shows:

Open the type which need to be transferred, pitch on the content of picture will be transferred, such as (1), in the drop-down list of (2), pitch on the type which the pictures will transfer to, click "submit", jump successfully (note: after jumping successfully, the content of picture jump from the original type to the type which pitched on, the process is not "copy", but equal to "cut "operation)

4) Create code:

Create code: When we add news items of homepage or other page ("Single page" / "Independent page"), it is inefficient to add manually and get more trouble when update news. So we use "Create code "here, "Create code "create the pictures content of items which pitched on "dynamic code ", insert homepage or other webpage, when the back of this pictures item upgrade, the items(homepage/other page inserted create code)of pictures which insert create code upgrade along with it automatically.

Operation: enter into the back of "Pictures ", click the "create code "in the upper of back

In the back, we enter into the following page shows:

	Data Manager T	Type Manager		Transfer Type	Create Code
0	🛛 commodity - Create Code				
	Type Name:	Тор 💌			
	Per Row Count:	5]	
	Total:	15]	
	Sort:	Descent 💌			
	Thumbnail Width:	100]рх	
	Trombnail Height:	100		рх	
	Title Font Size:	10	1	pt

O Shopping - Create Code						
	Type Nane:	Тор	•			
	Per Row Count:	5				
	Total:	15				
	Sort:	Descer	nt 💌			
	Thumbnail Width:	100		рх		
	Trombnail Height:	100		рх		
	Content Font Size:	10		pt		
	Content Font Color:		Select O	Color		
			Submit			

It is simple to use "Create code ", select some condition shown, press "submit" button, then create the code. The setting method is the same with "News", for details see page 68 (thumbnail width/height: means the size of thumbnail which displayed in front by the code; Content font/color: The character size/color of the products introduction).

After setting the options above, we enter into the page shown below after submit:

FRISTUES.COM	www.fristweb.com NETWORKING		TECHNOLOGY	(THAILAND)	COMPANY LIMITED
Data Manager	Type Manager	Transfer Type	Стеа	te Code	
Shopping - Create Code

Code preview <u>potato</u> <u>potato</u> Have more if it is good taste <u>Score: 2</u> <u>Buy</u>

Copy the code to the page which needs to be inserted.

7.11 Self form

Website management - Self form

It is the item which designed by yourself, such as investigate, feedback, etc.

The management of "Self form "include "Data manager", "Set item name and error information".

Operation:

③ Build "Self form"

Path: Manage menu in the left side of backstage "Website management"→ "Add new item", select the type: "Download".

C Edit "Self form"

1) Data manager:

Search

www.fristweb.com

	Data Manager	Set Item Name and Error Information
Registration		

Item Nam	ue 🔰	Words	Match		Match Case
Field1	-		Fuzzy	E	Case Sensitive
Field1	-		🔽 Fuzzy	E	Case Sensitive
Field1	-		🔽 Fumy	E	Case Sensitive
Field1			Fuzzy	E	Case Sensitive
Field1			Fumy	E	Case Sensitive
Ched		Show 0 · 0 / 0, Total 0 Pages]		
Delete	Operation	Song	Color	Movie	Bool

We may "delete" and "check" the information submitted by users.

2) Set item name and error information:

Item name: The item name displayed in front which needs users fill in.

Set item name and error information: pop hint when the information submitted in front is not corresponding with request. You should set it according to the actual circumstance of item type.

Submit

Operation: Enter into the back of "Self form ", click "Set item name and error information in the upper of back, the following image shows:

www.fristweb.com

NETWORKING TECHNOLOGY (THAILAND) COMPANY LIMITED

Data Manager

Set Item Name and Error Information

Registration - Set Hem Name and Error Information

Show	İtem Name	Error
	Field1	
N	Field2	
N	Field3	
N	Field4	
N	Field5	
V	Field6	
N	Field7	
V	Field8	
R	Field9	
N	Field10	
N	Field11	
	Field12	
N	Field13	
	Field14	
N	Field15	
	Field16	
	Field17	

"Item name "default from "field1 "to "field30", we input the item name which will be displayed in front.

Input content in "error "which match with the fields (when input item name and error information, it will display in front which pitched on "show ", otherwise it will hide).

8 Introduction of on-line HTML

Let's elaborate the function of tool bar in HTML:

Format 🔽 Font	Font Siz 💌 B 🛛 🖳 🚣 🧭 🛪 🗛 🕼	2 👗 🗈 🛍 🗙
⊴ 🛯 🖉	≘ ∃ ‡ ‡ ≒ ⊟ ⊟ ጭ ぬ & ∞ ₪ ∾ ∦ ∦ X × ⊞	i 💦 🚯 📧 🎐
(□)≅ ⊞ ⊶ ∘	× Å Å X × ⊨	

- B : Bold
- I : Italic
- <u>U</u> : Underline
- ×² : Superscript
- ×2 : Subscript
- ABC : Strike through
- M : Marquee
- 🖉 : Remove format
- 👗 : Cut
- 칠 : Copy
- 🛍 : Paster
- × : Delete
- 🌖 : Undo
- 🍋 : Redo
- 🔳 : Justify left
- \equiv : Justify center
- 🗏 : Justify right
- 🔳 : Justify none
- 🗊 : Outdent
- 📰 : Indent
- $\frac{n}{n} = \frac{1}{n}$ Insert horizontal rule
-]∃: Ordered list
- \Xi : Unordered list
- 🔹 🚳 : Insert special char
- 🏘 : _{Replace}
- 🍓 : Creat link
- 🔅 : Unlink

- 🔜 : Insert image
- 💦 : Change image property
- 🍪 : Insert flash
- ɪ : Insert windows media
- Չ : Insert real media
- 💷 : Add a table
- 🐼 : Change table property
- 🎟 : Change cell property
- 📲 : Insert a row above this
- 📲 : Insert a row below this
- 📥 : Insert a column before this
- 💑 : Insert a column after this
- X : Delete column
- 🔀 : _{Delete row}
- 🗐 : Table guide line

8.1 Add a table
